Ted,

I was involved in an emergency project for the last few weeks and did not have time to continue reviewing the 3 Class 1 permit applications for Michigan Potash. However, the emergency project is wrapping-up and I have been able to devote more time to the Class 1 permit application reviews.

I received the response to the information request and have reviewed the well records that were submitted. Janette and I have also coordinated the Class 1 and Class 3 application reviews which should eliminate duplicated review work. Presently I am in the process of compiling the remaining outstanding issues for the Class 1 applications. Once compiled, I will call you to discuss these issues before proceeding w/ the draft permits and public notice. I should have this done this week and would like to call you this Wednesday (8/12) or Friday (8/14). Let me know your availability on these two dates.

thank you  
Allan Batka

**Subject:** MPO Class I Draft Permit

Hello Allan,

How is it going with the Michigan Potash work? Did you receive our additional information regarding the Pilarski wellbore?

Have you been able to effectively work with Janette, and is there a time frame that we might expect to let the public review the draft permit? I'd like to coordinate all the public comment periods if possible.

Sincerely,

Ted Pagano  
GM
